

PE Curriculum Intent

The PE curriculum is designed in order for all students to experience and learn a wide variety of skills across a number of different sports, health and exercise. This aims to encourage lifelong participation in sport, health and exercise post education. Across three key stages the department aims to increase knowledge on how to play, access and compete in a multitude of sports and activities be it team or individual pursuits. The curriculum follows progressive schemes of learning which begin in KS3 and lead through to the end of KS5. The curriculum also introduces students to a number of sporting careers so they can make informed choices regarding higher education.

The PE department has a number of academic qualifications which build on learning to help students progress to further education. There are a variety of qualifications to choose from in order to cater to the needs of different learners at Vyners. There are two academic pathways at KS4; GCSE PE and OCR Sports Studies which lead into two academic options at KS5; A-Level PE and CTEC in Sport and Physical Activity. The PE department have a proven track record of excellent results giving students an excellent platform into higher education.

Curricular PE is also streamlined with co-curricular activities with students being able to represent the school based on their attainment in lessons alongside their commitment to the co-curricular program.

KS3	<p>Throughout KS3 students are exposed to a wide range of games based and PE based activities. During Year 7 and 8 there is an emphasis on the development of core skills, movement and knowledge development. Students will learn how to move, coordinate and develop their physical attributes through progressive schemes of learning. Students will have 2 PE lessons a week; one lesson will focus on a games based activity (Rugby, Football, Hockey, Basketball, Netball, etc) and the other will be based around Physical Education (Fitness, OAA, Badminton, Gymnastics, Dance etc.). Throughout KS3 students will be exposed to KS4 terminology to enable them to gain insight into the academic language, options available post KS3.</p> <p>All students study Core PE which follows the National Curriculum Programmes of Study for KS3.</p> <p>Students also have the opportunity to study PE or Sports Studies as an option and these courses will focus on transferable skills development whilst following relevant KS4 content from the spring term of year 9.</p>
------------	--

KS4	<p>Core PE: PE at KS4 remains constant throughout every student's timetabled curriculum. Students will continue with two core PE lessons a week which further builds on what has been delivered across KS3. As students mature there is an increased emphasis on the technical and tactical development of their previously learnt knowledge. The curriculum is progressive from KS3 and builds on the knowledge developed during these years. As students progress through KS4 their options in PE increase and they are able to have a selective approach to what they choose to participate in. This is encouraged by the department to increase the likelihood of a long lasting love for Physical Education extending past curricular PE.</p> <p>GCSE PE: One academic option is GCSE PE. This is available for students to select towards the end of Year 8 following on from parents evening discussion, careers evening, careers fayre and tutorial information sessions. This course is completed over two years</p>
------------	---

	<p>finishing with two terminal examinations in Year 11 which equates to 70% of the qualification. 30% of the qualification is made up of a practical assessment where students will be assessed in three sports consisting of one team sport, one individual sport and one other either team or individual. This will be assessed alongside a personal exercise program which is completed as coursework during theory lessons. Students taking GCSE PE will have 5 timetabled lessons a fortnight. Year 9 students will be delivered a skeleton SOW to allow students to develop the relevant knowledge and transferable skills that will allow them to transition to Year 10 content.</p> <p>Sports Studies: The second academic option is Sports Studies. This is available for students to select towards the end of Year 8 following on from parents evening discussion, careers evening, careers fayre and tutorial information sessions. The Sports Studies course is a modular qualification where students study Units across the three years completing a unit before progressing onto the next. This qualification has a combination of assessments which include coursework, practical assessment and one unit of examination which will be sat in Year 11. This qualification is favoured by students who prefer coursework and a modular framework opposed to terminal examinations.</p>
<p>KS5</p>	<p>A-Level PE: Our A Level in Physical Education develops knowledge, understanding and skills relevant to physical education. Students gain understanding of the scientific, psychological and socio-cultural factors that underpin physical activity, and demonstrate their ability as either performer or coach. This qualification is filled with a range of content across the sporting spectrum developing individuals' knowledge in preparation for a possible career in teaching, sports medicine, nutrition, coaching, strength and conditioning to name a few. This course is completed with three terminal exams completed in the summer of Year 13.</p> <p>Sport and Physical Activity Diploma: This qualification provides learners with the knowledge, understanding and skills that they need to prepare them for employment or higher education in the sports, health and leisure industry. The qualification is equivalent in size to two 'A' levels studied over two years. The qualification is a level 3 qualification for post - 16 learners who want to achieve their potential and progress to the next stage of their lives whether it be in higher education, an apprenticeship or employment. It aims to develop students' knowledge, understanding and skills of the principles of sport and physical activity to a wide range of participants. This qualification is modular and students progress through units of study throughout the two year course. There are three examinations two of which are completed in January of Year 12 and one in January of Year 13.</p>

Subject PE KS3		FUNCTIONS OF ASSESSMENT		
		FORMATIVE; The instructional guidance that identifies central points of learning and plans for the progression of individuals students.	SUMMATIVE; This describes individuals learning at the end of an instructional unit by comparing it against a standard or benchmark. (High Stakes Assessment)	EVALUATIVE; This is about institutional accountability and comes after terminal exams.
TI ME SC AL E	Annually	Assessment in each sport/activity undertaken and students graded against M,S,D,E criteria	An end of year grade is generated from all of the activities completed over the year – an average is taken. Students will sit a short assessment testing them on their knowledge from the terms PE lessons	The grade at the end of the year is compared to their projected grade. Their grade plays an important part in generating set lists and deciding on options.
	Interim <i>Could be termly or half termly</i>	Half termly schemes of learning are completed. The assessment criteria is shared with students in the first few weeks.	Half termly schemes of learning assessed against criteria at the end of every half term. At the data points, an average of the activities completed so far is taken.	
	Weekly	Verbal feedback. Questioning. Suggestions of clubs to go to extend learning further.		
	Hourly	Lesson objectives.		

	<p>Teacher, peer and self assessment – verbal feedback.</p> <p>Questioning.</p> <p>Success criteria explained.</p>

Subject		FUNCTIONS OF ASSESSMENT		
PE KS4 GCSE & Sport Studies		FORMATIVE; The instructional guidance that identifies central points of learning and plans for the progression of individuals students.	SUMMATIVE; This describes individuals learning at the end of an instructional unit by comparing it against a standard or bench mark. (High Stakes Assessment)	EVALUATIVE; This is about institutional accountability and comes after terminal exams.
TI ME SC AL E	Annually	Early theory test at the beginning of the year.	An end of year grade is generated from all of the assessments completed over the year. Year 10/11 Trial exams	The grade at the end of the year is compared to their projected grade. Their grade plays an important part in whether they should continue the subject as an option in Year 10 and which qualification they should do.
	Interim Could be termly or half termly	Theory topics are taught in blocks for as long as the topic takes. At the end of the topic a test is sat but it is accumulative, i.e. if topics have been taught before there may also be questions on that topic in the test too. Practical activities are visited throughout year 9 to assess practical capability in terms of the GCSE criteria.	Tests are levelled against the grade boundaries/Predicted grades	
	Weekly	Verbal feedback. Questioning. Suggestions of clubs to go to extend learning further.		
	Hourly	Lesson objectives. Teacher, peer and self assessment – verbal feedback.		

	<p>Questioning.</p> <p>Success criteria explained.</p> <p>Low stakes testing</p>
